direction of the UD carbon fibres (7) as contrast fibres.

- 10. (Amended) SMC according to Claim 1, characterised in that the SMC weight per unit area is less than 1000 gram/m².
- h₂ 11. (Amended) SMC according to Claim 1, characterised in that the resin matrix (2) contains electrically conductive additives.
 - 12. (Amended) Process for producing a fibre-reinforced SMC according to Claim 1, characterised
 - in that SMC mats with a single layer of UD fibres (7) are produced and
 - in that a plurality of SMC mats is arranged, prior to further processing to form the component (16), with multi-axial alignment of the UD fibres (7) by building up into a stack (19).
 - 14. (Amended) Process according to Claim 12, characterised in that at least four UD fibre layers (7) are arranged.
 - 16. (Amended) Process according to Claim 12, characterised in that at least six UD fibre layers (7) are arranged.
- Ar 18. (Amended) Process according to Claim 12, characterised in that eight UD fibre layers (7) are arranged.
 - 20. (Amended) Process according to Claim 12, characterised

As.

Pu

- in that the SMC mats are cut into strips (12) and would onto spools or reels (8),
- in that the strips (12) are cut to length and arranged in rectangular blank layers and
- in that the individual blank layers (11) are built up into a stack (19) on a rotary

- 23. (Amended) Process according to Claim 1, characterised in that the strips
- (12) are wound onto spools with a core diameter of greater than 200 mm and an outside diameter of greater than 500 mm.
- 24. (Amended) Process according to Claim 1, characterised in that the SMC is flowable and the blank size is always smaller than the laid out component surface.
- 25. (Amended) Component made of fibre-reinforced thermosets, characterised in that this component is produced from an SMC according to Claim 1.
